Professional Summary

Data Analyst and MBA first-year candidate blending a background in business operations with technical expertise in Python, SQL, and predictive modeling. Transitioning from roles in project coordination and business management, I bring a practical perspective on using data to drive revenue, optimize logistics, and improve customer satisfaction. I specialize in building reliable data pipelines, designing clear visualizations, and translating complex datasets into straightforward, actionable business strategies.

Technical Skills

- **Programming & Databases:** Python, SQL (MySQL), Advanced Excel, Power BI
- **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, python-dotenv, SQLAlchemy, mysql-connector-python
- **Tools & IDEs:** VS Code, MySQL Workbench, Jupyter Lab, Anaconda, Git/GitHub, Linux/Windows environments
- **Core Competencies:** Data Cleaning & Processing, Exploratory Data Analysis (EDA), Predictive Modeling, Linear Regression, Data Visualization, Business Intelligence

Data Analytics Projects

Olist E-Commerce Analysis | *April 2026*

- **Framework:** Applied the industry-standard 6-stage data process (Ask, Prepare, Process, Analyze, Share, Act) to evaluate over 100,000 rows of Brazilian e-commerce data.
- **Environment Management:** Configured an isolated workspace using Anaconda to ensure code reproducibility and reliable execution across different systems without version conflicts.
- **Data Pipeline:** Engineered a secure and scalable pipeline using Python (Pandas, NumPy) to extract, clean, and merge 6 relational MySQL tables into a single master analytical dataset.
- **Predictive Modeling:** Developed a Linear Regression model with Scikit-learn to quantify the impact of shipping delays, proving that late deliveries caused average review scores to drop from 4.29 to 2.27 stars.
- **Data Visualization:** Designed high-impact exploratory charts using Matplotlib and Seaborn to pinpoint geographical shipping bottlenecks and correlate logistics performance with customer satisfaction.
- **Business Strategy:** Translated technical findings into actionable executive recommendations, including auditing underperforming shipping partners and launching geo-targeted VIP programs to optimize delivery lead times.

Pizza Sales Data Analysis | Guided Project | March 2026

- Processed a pizza sales dataset to identify peak ordering times, top-selling items, and overall revenue distribution.
- Summarized raw transactional data to generate a clear, high-level overview of the restaurant's business performance and seasonal trends.

Education & Certifications

- **MBA in Analytics and Data Science** | Manipal University Jaipur | Expected: 2028
- **Data Analytics Certification** | Top Mentor | Expected: August 2026
- **Google Data Analytics Certificate** | Coursera | Expected: April 2026
- **Bachelor of Commerce (B.Com)** | Jiwaji University | 2017

- **Diploma in Computer Application (DCA)** | Makhanlal University | 2016

Professional Experience

Government Contractor | Independent | March 2025 – Feb 2026

- Provided gatepass services to a district hospital by managing staff and security operations.
- Recruited and managed a high-performing team to deliver quality services, maintaining strict adherence to government requirements.
- Calculated operational budgets, managed revenue, and tracked expenses and salaries to ensure consistent project profitability.

Business Manager / Franchise Owner | Momo Heist | Nov 2024 – Feb 2025

- Oversaw daily operations for a fast-paced cafe franchise, handling inventory tracking, vendor relations, and customer service resolution.
- Tracked daily sales data to monitor financial performance and optimize the operational budget.
- Implemented new operational strategies to increase daily revenue and improve customer retention rates.

Development Officer | Life Insurance Corporation of India (LIC) | Aug 2023 – Sept 2024

- Analyzed local demographic and market trends to identify prospective agents, mentoring them to build their income streams and achieve company targets.
- Recruited and mentored a team of 25+ agents, guiding their career development and coordinating their efforts to align with organizational sales goals.
- Expanded a portfolio of 200+ clients by providing tailored financial and insurance solutions based on individual risk profiles.
- Fostered a collaborative work environment by building strong relationships with management and junior staff.

Operations Assistant | Family Retail Business | 2016 – 2023

- Managed daily retail operations, including inventory forecasting, customer relations, and daily sales reporting.
